To Whom It May Concern

Greenoak Builders have worked on numerous projects where we have been the structural engineers. Most of this work involved major structural alterations to existing buildings. Greenoak are familiar with temporary supports & steel installation.

Projects carried out: -

**Pete Waterman Studio – Deansgate, Manchester**

Renewal of cast iron column supports to upper structure  
Install of 17m steels in the basement.  
Provide 6000sq ft of clear space for the studio

**Greenwich Dome**

Structural support to sound insulation throughout the project

**Centrestage Studios – London**

Additional support to 12,000sq ft roof area to enable the fitting of sound insulation

**Flint Barn – Norfolk**

Conversion of old flint stable block with new extension giving 4 bed roomed accommodation

**Brook Farm – Norfolk**

Conversion of 1850 farmhouse, doubled the footprint of the building. Support of walls etc to form new access in existing building. Extensions of 27` x 18` ensuite master bedroom, with double garage to side, with self contained annex above.

Their work has always been carried out in an efficient & professional manner.
